

## Beautiful backdrops

With the sets designed and the canvases delivered, the pupils' next task was to transfer their designs to the canvases, scaling their work up using a grid. No calculators were involved, just lots of tricky mental maths! They then sketched out their designs and began painting.

## Practical props

This term also saw the design and construction of the furniture and props needed for the shows – everything from thrones to cauldrons!

## Next year's projects – it could be you!

We're currently recruiting schools for the 2016-17 academic year – if you'd like to host a project, contact [admin@yppt.org.uk](mailto:admin@yppt.org.uk) or ring 07914 830730. We're particularly keen to hear from schools in the Cambridge, North London and Brighton areas, but are happy to hear from any interested schools!
